

1. Project Engineer (Control Systems & Instrumentation) – Experience of 3-9 years

Job Profile:

Principal Duties and Responsibilities:

- Basic design knowledge of Instrument Loop Diagram, cable schedule, Data sheets for Instruments and specification of control systems
- Basic Estimation, Cost planning
- Material take off, Techno- commercial evaluation of quotes
- Leading Site execution works like installation, testing and commissioning
- Preparation of reports on project for management
- Control Schedule and cost of the project
- Attending Project meeting with client
- Closure of the project in successful manner

Requirements

- Available on Transferrable IQAMA
- Graduate Engineer in Electronics/ Instrumentation/ Electrical

2. Project Engineer/ Supervisor (Electrical & Instrumentation) – Experience of 3-9 years

Job Profile:

Principal Duties and Responsibilities:

- Basic design knowledge of Instrument Loop Diagram, cable schedule, Data sheets for Instruments, specifications of control systems, SLD, Key schematic Diagrams, etc.
- Basic Estimation, Cost planning
- Material take off, Techno- commercial evaluation of quotes
- Leading Site execution works like installation, testing and commissioning
- Preparation of reports on project for management
- Control Schedule and cost of the project
- Attending Project meeting with client
- Closure of the project in successful manner

Requirements

- Available on Transferrable IQAMA
- Graduate Engineer in Electronics/ Instrumentation/

3. Testing and Commissioning Engineer (LV/MV Electrical Equipment) – Experience of Min.5 years

Job Profile:

Principal Duties and Responsibilities:

- Basic design knowledge of Protection relay coordination, settings, SLDs, cable schedule, Key schematic Diagrams, etc.
- Basic Estimation, Cost planning
- Material take off, Techno- commercial evaluation of quotes
- Leading Site Testing and Pre-commissioning works for MV/LV Equipment
- Preparation of testing and pre-commissioning reports
- Control Schedule and cost of the project
- Attending Project meeting with client
- Closure of the project in successful manner
- Available on Transferrable IQAMA
- Graduate/ Diploma Engineer in Electrical

4. MV Cable Splicers – Experience of Min.5 years

Requirements

- Available on Transferrable IQAMA
- SCECO/ Aramco Certified for 35/69KV MV cable splicers

5. Fiber Optical/UTP/STP cable Splicers – Experience of Min.3 years

Requirements

- Available on Transferrable IQAMA
- Aramco Certified for OFC cable splicers
- Testing of cable after termination like OTDR

6. Instrument Technicians – Experience of Min.4 years

Job Profile:

Principal Duties and Responsibilities:

- Basic knowledge of Instrument Loop Diagram, cable schedule, Data sheets for Instruments, control systems etc.
- Preparation of Calibration reports, loop folders

Requirements

- Available on Transferrable IQAMA
- Certificate/ Diploma from Technical Institute in Electrical or equivalent.
